

Position Description

Senior Full Stack .NET Engineer

FNF Canada is a leading service provider to financial institutions in the area of mortgage processing, appraisal services, and title insurance. We pride ourselves on our relentless focus on enhancing the value of our services to our clients through continuous improvement and innovation.

Reporting to the Vice President Technology, the ideal candidate will be a client focused, highly professional self-starter with demonstrated experience in a similar function. The incumbent will be required to quickly develop an in-depth knowledge of our Systems and become familiar with corollary systems and technologies. Our platform is built primarily using Microsoft stack and we are fully committed to migrating over to .NET Core, Angular/React, REST, SQL & Azure. You will be a part of the full SDLC, extending existing features while helping architect and design new functions from scratch.

Primary responsibilities:

- Demonstrated ability to lead a technical team through full software development life cycle
- Participate in full SDLC (SCRUM/Agile), including iterative development, sprint estimation and design sessions
- Act in a technical leadership capacity: Mentoring junior engineers, new team members, and applying technical expertise to challenging programming and design problems
- Achieving an understanding of the business objectives as it relates to software development
- Experience building secure, complex, and scalable APIs, from design through deployment
- Experience with SQL development, data modeling and data structures for high-volume and high-velocity data (SQL Server, MongoDB, MySql etc.)
- Experience with Build & CI tools (Release Management, Jenkins etc.)
- Proven interest in learning about and using new technologies, as we work with a diverse technical stack (SOLR, Redis, RabbitMQ, HDFS, Angular, React, HTML5, Xamarin, EasyMock, Mockito, Postman, OAuth/Web tokens)
- Strong hands-on Infrastructure experience including Web Servers, Containers (docker, kubernetes), Virtualization, Load balancing.
- Experience with Cloud technologies (Azure, AWS) with focus on natively building application for Cloud platforms.
- Scrum Master experience and strong demonstrated experience with DevOps in Agile team environment
- Experience with ALM tools (TFS, JIRa, etc.)

Position Description
Senior Full Stack .NET Engineer

Qualifications:

- Minimum 5-7 years' experience working with .NET based web technologies (ASP.NET, C#)
- Experience with Angular, React
- Experience with RESTful and service-oriented design & application architecture
- Experience leading application development projects
- Demonstrated capability in setting and influencing technical direction at all levels of an organization
- Experience in mentoring development resources
- Strong desire to lead teams
- Capacity to work within tight deadlines, often while balancing multiple, conflicting priorities
- Must be able to work

We are looking for you to bring to the team:

- A desire to learn and grow
- Passion, excitement and creativity
- Open mind to new ideas and delivery

FNF Canada offers a competitive compensation and benefits package along with career growth opportunities with a Fortune 500 Company.

Interested candidates should forward their resume via e-mail to aiqbal@fnf.ca or by fax to 877-916-8035. We thank all candidates for their interest but only those selected for an interview will be contacted.
